# *Flexi-Fit*

## Door Frame Kit

Flexi-Fit Adjustable Rounded, Moulded and Square Architraves. Available in 69mm and 94mm

Flexi-Fit Patented Rounded, Moulded and Square Door Frame System

The TM Flexi-Fit door frame system is adjustable to accommodate different wall thicknesses, door thicknesses and door heights. The frame is passed for use with a 1/2 hour fire door. Installation is much quicker on site due to the adjustability of both the architrave and door stop, and most of the machining being done in the factory prior to fitting. No nails are needed on the face side as the architrave is pinned behind the door stop giving a neat finish.

### Distribution Centre

Unit 6, Blueberry Business park  
Kingsway, Rochdale OL16 5DB
