BRIDGING UNITS: 500, 600, 800, 900mm

IMPORTANT INFORMATION- PLEASE READ CAREFULLY

Shown below is a general assembly diagram and a list of fittings. These show the correct number of parts and fittings required to assemble the cabinet. Please note that all parts are identified by a capital letter (eg. A) and fittings are identified by a lower case letter (eg. a). These will be referred to in the following instructions.

The assembly sequence is shown in logical numbered steps.

There may be extra parts and fittings supplied, do not discard these until your kitchen is completed.

The important parts within these steps have been highlighted to help with identification.

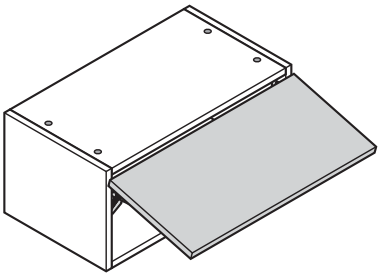
Note: Doors referred to in these instructions are supplied separately.

Useful tips: Lay large panels on the floor and use the packaging to protect the panels.

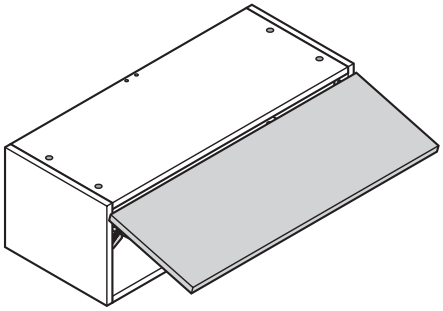
Do not overtighten screws. Plumbing, gas and electrical services should be prepared by an approved tradesman before installing the new kitchen.

Important: There are two heights of Bridging Units but, unless stated otherwise, assembly of the units is similar. The 900mm wide unit has a vertical back rail which is not fitted to 500 and 600 wide units..

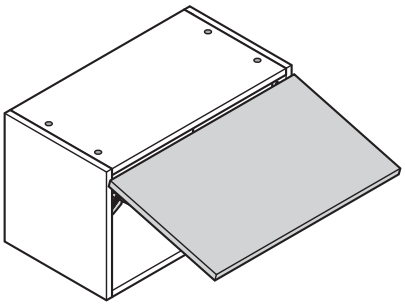
CAUTION: SMALL FITTINGS CHOKING HAZARD. KEEP AWAY FROM SMALL CHILDREN.



290mm High
500, 600mm wide

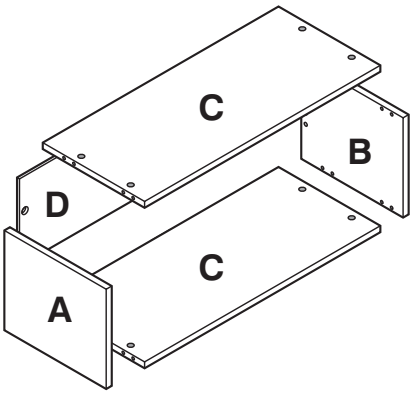


290mm High
800, 900, 1000mm wide

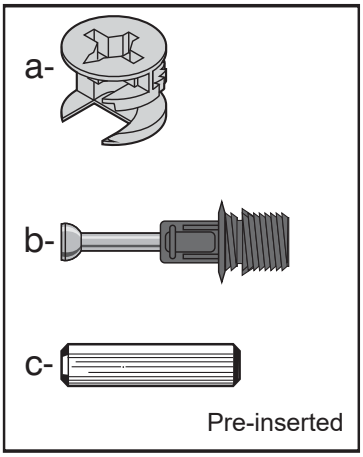


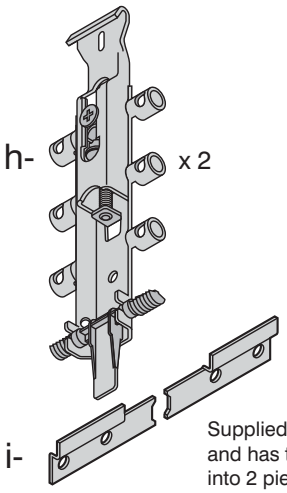
360mm High
500, 600mm wide

COMPONENTS

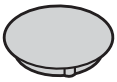


FITTINGS

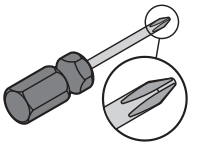


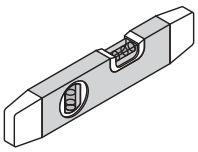


Supplied as one piece and has to be snapped into 2 pieces.



TOOLS REQUIRED

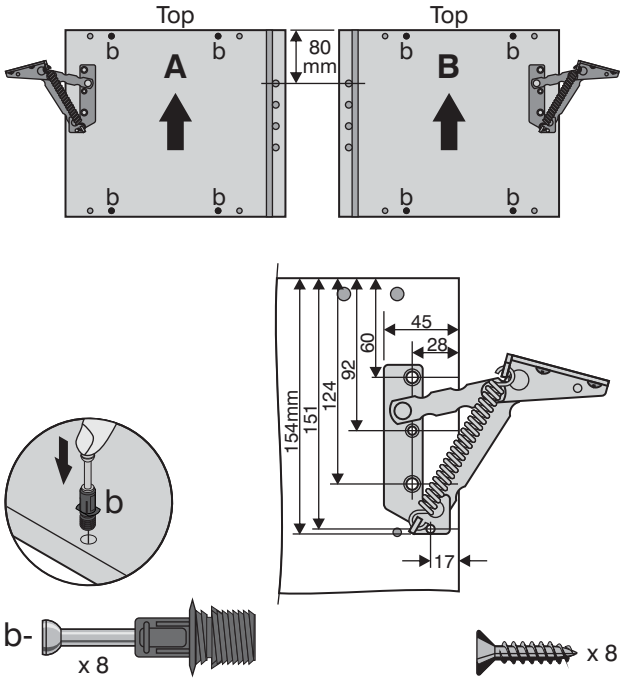




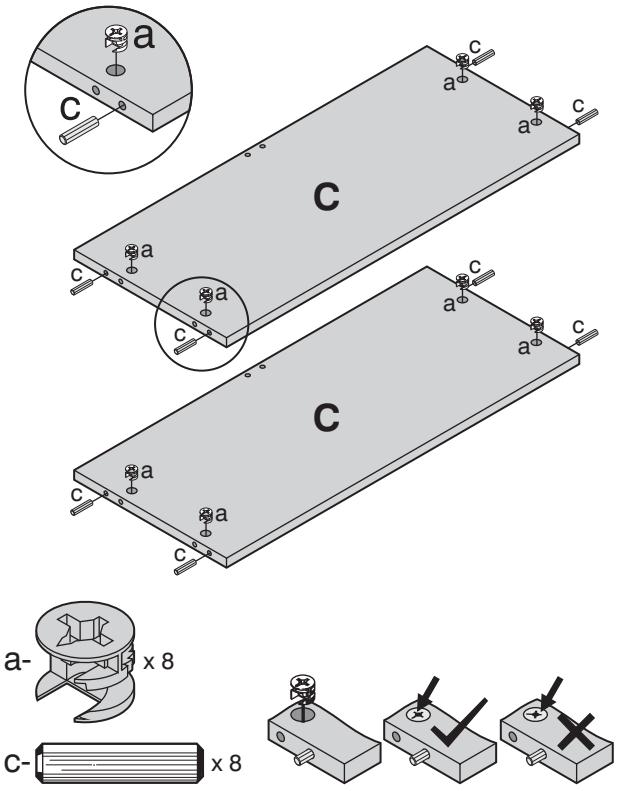
1

Fix the fittings '**b**' to the side panels A and B in the positions shown. Do not use a mallet.

The Lift-Up Hinges should be fitted at this stage. Fit with the screw supplied with the hinges.



2



3
