DRESSER UNIT: 500mm

IMPORTANT INFORMATION- PLEASE READ CAREFULLY

Shown below is a general assembly diagram and a list of fittings. These show the correct number of parts and fittings required to assemble the cabinet. Please note that all parts are identified by a capital letter (eg. A) and fittings are identified by a lower case letter (eg. a). These will be referred to in the following instructions.

The assembly sequence is shown in logical numbered steps.

There may be extra parts and fittings supplied, do not discard these until your kitchen is completed.

The important parts within these steps have been highlighted to help with identification.

Note: A door is referred to in these instructions but is supplied separately.

Useful tips: Lay large panels on the floor and use the packaging to protect the panels.

Do not overtighten screws. Plumbing, gas and electrical services should be prepared by an approved tradesman before installing the new kitchen.

CAUTION: SMALL FITTINGS CHOKING HAZARD. KEEP AWAY FROM SMALL CHILDREN.
